Noah Aghedo

Software Engineer

Summary

As a full-stack developer with expertise in the MERN stack, I bring a wealth of knowledge in building robust, scalable web applications. With experience in both front-end and back-end development, I am well-versed in developing and implementing APIs, integrating with third-party services, and leveraging cloud technologies. My proficiency in JavaScript, React, Node.js, and MongoDB enables me to deliver end-to-end solutions that meet the highest quality standards. With a passion for clean code and an eye for detail, I am committed to delivering projects on time and on budget, while ensuring the best possible user experience.

Experience / Projects

Freelancing
May 2021 to present

I have acquired some experience by building websites for small organisations and individuals. I have created full-stack web applications to assist these small and medium enterprises.

Shopping Cart

I created a shopping cart that lets users add, remote and delete items from the cart. I fetched from an external API and also used the Context API to manage state globally.

Education

University of Benin

2015 to 2021

Bachelor of Engineering(Petroleum)
Second Class
